**ABOUT THE CONFERENCE**

Biodiversity has a significant place in today's society, not only as a link to our heritage and the traditional use of natural resources but also as a basis for economic stability and growth. Sustainable management of biodiversity integrates the social, environmental and economic aspects ensuring that the needs of the present generation are met without compromising the ability of future generations to meet their own needs.

The conference is being organized on blended mode to perceive the data, information, traditional techniques, new ideas, new innovations etc. for further research on biodiversity and conservation. The primary objective of the seminar is to provide a common platform to researcher, academicians, and students for presentation, discussion and critical analysis of the various aspects of biodiversity and the application of this knowledge to sustainable utilization, conservation, policy issue and societal benefits.
